Section 8 Other Events

Item 8.01 Other Events.

On March 18, 2010, CryoLife, Inc. ("CryoLife") sent a letter to the Board of Directors of Medafor, Inc. ("Medafor") and issued a press release regarding the same. Also, CryoLife updated the home page and the Frequently Asked Questions portion of the Medafor offer portion of its website. These documents are available at www.cryolife.com/medaforoffer and/or have otherwise been disseminated by CryoLife. The letter to the Medafor Board, the press release, the home page of the Medafor offer portion of the CryoLife website and the Frequently Asked Questions portion of the Medafor offer portion of the CryoLife website are attached hereto as Exhibits 99.1, 99.2, 99.3 and 99.4, respectively.

This filing and the exhibits hereto are provided for informational purposes only and are not offers to purchase nor a solicitation of offers to sell shares of Medafor or CryoLife. Subject to future developments, CryoLife may file a registration statement and/or tender offer documents and/or proxy statement with the SEC in connection with the proposed combination. Shareholders should read those filings, and any other filings made by CryoLife with the SEC in connection with the combination, as they will contain important information. Those documents, if and when filed, as well as CryoLife's other public filings with the SEC, may be obtained without charge at the SEC's website at www.sec.gov and at CryoLife's website at www.cryolife.com.

Title: Executive Vice President, Chief
Operating Officer and Chief
Financial Officer

March 18, 2010

VIA FEDEX
Michael F. Pasquale, Chairman of the Board
Medafor, Inc.

Dear Michael,

As Medafor's largest shareholder, CryoLife is deeply concerned about the rationale for and transparency surrounding Medafor's recent agreement with Magle Life Sciences announced on March 12, 2010.

As we predicted, you have again diluted existing Medafor shareholders without providing adequate value in return. We are deeply dismayed that you have seemingly given away almost 10 percent of Medafor, in addition to an undisclosed amount of much-needed cash, for the rights to a technology to which we believe you already have exclusive access. Given the absence of any other compelling business rationale, and your failure to provide your shareholders with an explanation of the substance of the transaction, we can only conclude that the sole purpose of the Magle Life Sciences ("Magle") transaction is to further entrench Medafor's management and board and prevent a combination between CryoLife and Medafor. In addition, the issuance of this significant block of stock is contrary to comments that your management and board have made to shareholders regarding Medafor's significant improvement in operating results and cash flow, which you indicated would be sufficient to fund your operations and growth strategy.

CryoLife has attempted in earnest for over the past 16 months to engage Medafor in friendly, good faith negotiations to arrive at a transaction that would enable HemoStase and related products to reach their full potential, and create value for Medafor and CryoLife shareholders. Unfortunately, every attempt we have made to create value for Medafor shareholders has been frustrated by a value-destructive action or response from Medafor's management and board.

As you know, we anticipated that Medafor management would be required to continue to engage in dilutive financings in order to fund its operating plan, and we have expressed our concerns in this regard to you and to our fellow Medafor shareholders. Nonetheless, we did not believe that Medafor's management and board would act in direct conflict with their fiduciary duties and inflict material dilution upon their shareholders, without obtaining any cash investment in return, in what appears to be an obvious effort to deny existing Medafor shareholders the right to choose whether or not to enter into a business combination with CryoLife.

We believe the dilutive share issuance to Magle was undertaken for the sole purpose of diluting CryoLife's holdings and therefore making any subsequent action to acquire Medafor significantly less likely to succeed. Unfortunately, this share issuance is clearly harmful to all Medafor shareholders, and further demonstrates the lengths to which Medafor's management and board will go in order to entrench themselves and preserve their excessive compensation.

Given the impact of the recent additional dilution on the value of your stock, and our concerns that Medafor's management and board will continue to cause intentional additional harm to shareholder value, CryoLife will withdraw its \$2.00 per share proposal in 5 business days. During this time period, we will urge Medafor shareholders to contact the Medafor board and impress upon them the need to uphold their fiduciary responsibilities, including providing all Medafor shareholders with sufficient details regarding the Magle transaction so that we can all understand the impact it has on the value of Medafor common stock. We remain willing to enter into discussions with you about a combination; however, after 5:00 p.m., March 24, 2010 our current proposal to acquire Medafor will terminate.

In the event that you fail to provide your shareholders with adequate information regarding the Magle transaction and we withdraw our proposal for the reasons discussed above, we will remain Medafor's largest shareholder, and we intend to pursue all actions necessary to preserve the value of our investment, including the exercise of our right to call a special meeting of shareholders or pursue litigation in defense of our rights.

About CryoLife, Inc.

Founded in 1984, CryoLife, Inc. is a leader in the processing and distribution of implantable living human tissues for use in cardiac and vascular surgeries throughout the U.S. and Canada. The Company's CryoValve® SG pulmonary heart valve, processed using CryoLife's proprietary SynerGraft® technology, has FDA 510(k) clearance for the replacement of diseased, damaged, malformed, or malfunctioning native or prosthetic pulmonary valves. The Company's CryoPatch® SG pulmonary cardiac patch has FDA 510(k) clearance for the repair or reconstruction of the right ventricular outflow tract (RVOT), which is a surgery commonly performed in children with congenital heart defects, such as Tetralogy of Fallot, Truncus Arteriosus, and Pulmonary Atresia. CryoPatch SG is distributed in three anatomic configurations: pulmonary hemi-artery, pulmonary trunk, and pulmonary branch. The Company's BioGlue® Surgical Adhesive is FDA approved as an adjunct to sutures and staples for use in adult patients in open surgical repair of large vessels. BioGlue is also CE marked in the European Community and approved in Canada and Australia for use in soft tissue repair. The Company's BioFoam™ Surgical Matrix is CE marked in the European Community for use as an adjunct in the sealing of abdominal parenchymal tissues (liver and spleen) when cessation of bleeding by ligature or other conventional methods is ineffective or impractical. BIOGLUE *Aesthetic*® Medical Adhesive is CE marked in the European Community for periosteal fixation following endoscopic browplasty (brow lift) in reconstructive plastic surgery and is distributed by a third party for this indication. CryoLife distributes HemoStase®, a hemostatic agent, in much of the U.S. for use in cardiac and vascular surgery and in many international markets for cardiac, vascular, and general surgery, subject to certain exclusions.

For additional information about the company, visit CryoLife's Web site: www.cryolife.com.

CryoLife Sends Letter to Medafor, Inc. Board of Directors

ATLANTA, GA (March 18, 2010) -- CryoLife, Inc. (NYSE: CRY), an implantable biological medical device and cardiovascular tissue processing company, announced today that it has sent the following letter to Medafor's Board of Directors:

March 18, 2010

VIA FEDEX
Michael F. Pasquale, Chairman of the Board
Medafor, Inc.

END

CryoLife's goal is to maximize the potential of Medafor's assets, particularly HemoStase® and the product's underlying technology, in order to deliver greater value for Medafor and CryoLife shareholders.

In pursuit of this goal, CryoLife acquired approximately 10.3 percent of Medafor common stock, based on the most recent information available, from Medafor shareholders, including its founders.

CryoLife presented a compelling proposal to Medafor's board of directors to purchase the remaining outstanding stock of Medafor for \$2.00 per share in cash and CryoLife stock, and requested that Medafor's board enter into discussions with CryoLife about this proposal. Medafor's board rejected this proposal and refused to negotiate with CryoLife. On March 12, 2010, Medafor announced an agreement with Magle Life Sciences that seemingly gives away almost 10 percent of Medafor, in addition to an undisclosed amount of much-needed cash, for the rights to a technology to which Medafor already has exclusive access.

Given the impact of the recent additional dilution from the Magle transaction on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal at 5:00 p.m. on March 24, 2010.

CryoLife has made numerous past attempts to engage with Medafor's management and board about a potential value-creating acquisition of the company by CryoLife. To date, Medafor has summarily rejected all of these overtures and refused to negotiate with us.

In order to provide our fellow Medafor shareholders with complete and timely information about our plans for Medafor, CryoLife has created this Web site and is encouraging Medafor shareholders to contact the Medafor board of directors to express their opinions.

CryoLife encourages Medafor shareholders to review the materials on this Web site thoroughly and plans to post updated information as it becomes available.

For answers to frequently asked questions, please go [here](#). If your question is not addressed, please email medaforinfo@cryolife.com or contact Nina Devlin at 212-704-8145.

ADDITIONAL IMPORTANT INFORMATION

This document is provided for informational purposes only and is not an offer to purchase nor a solicitation of an offer to sell shares of Medafor or CryoLife. Subject to future developments, CryoLife may file a registration statement and/or tender offer documents and/or proxy statement with the SEC in connection with the proposed combination. Shareholders should read those filings, and any other filings made by CryoLife with the SEC in connection with the combination, as they will contain important information. Those documents, if and when filed, as well as CryoLife's other public filings with the SEC, may be obtained without charge at the SEC's website at www.sec.gov and at CryoLife's website at www.cryolife.com.

Why did CryoLife acquire a stake in Medafor?

We acquired this significant stake in Medafor after several attempts to engage Medafor management in exploratory talks regarding a possible combination of our businesses. Additionally, as a business partner of Medafor we have observed a range of business practices that we believed were not in the best interests of CryoLife, Medafor's hemostatic technology or Medafor shareholders. We felt compelled to take action and consider our current stake in Medafor to be a first step in our efforts to acquire full control of Medafor. We believe HemoStase and Medafor's hemostatic technology have the best opportunity to achieve their full potential under our ownership. We believe that our experienced management team, strong direct sales force, international distribution network, and financial strength will allow us to drive additional growth of HemoStase and related products, and create value for CryoLife and Medafor shareholders.

How much of Medafor does CryoLife now own?

CryoLife believes it owns approximately 10.3 percent of the outstanding Medafor common stock and that it is now the largest single shareholder of Medafor, in addition to being Medafor's largest distributor.

What are the terms of the proposal CryoLife made most recently to Medafor?

On January 13, 2010, CryoLife sent a letter to Medafor's management and board requesting to enter into discussions with them regarding a potential acquisition by CryoLife of the remaining outstanding common stock of Medafor for \$2.00 per share in a combination of cash and CryoLife stock, subject to completion of reasonable due diligence. This would provide Medafor shareholders with certain value through a cash component, as well as the opportunity to participate in future upside through continued ownership of the combined company under CryoLife leadership.

Prior to the recent dilution related to the Magle Life Sciences ("Magle") transaction and based on our current knowledge of Medafor's business, we believed this proposal represented full and fair value, reflecting both the upside from the growth potential of HemoStase and the product's underlying technology, as well as the downside presented by the IP restrictions on this product.

Our proposal also represented a significant premium to the price at which we believe Medafor's own board and management have recently offered to convert debt into equity.

Given the impact of the recent additional dilution from the Magle transaction on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal at 5:00 p.m. on March 24, 2010.

What is the breakdown between cash and stock?

Negotiations with the Medafor board would allow us to determine the right mix of cash and stock. We believe a cash/stock offer is appropriate and attractive, as the cash component would provide Medafor shareholders with immediate and certain value, while the stock portion would allow shareholders to participate in future upside through continued ownership of the combined company. We think the prospects for CryoLife are strong and that Medafor shareholders will be able to realize additional value by owning our stock. It is also important to note that ownership of CryoLife stock would provide shareholders with further liquidity, as they would be able to trade this stock on the New York Stock Exchange. That said, given the current economic climate, we recognize that cash may be more important to some shareholders, and we are therefore prepared to evaluate how this is best addressed.

Given the impact of the recent additional dilution from the Magle transaction on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause intentional additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal at 5:00 p.m. on March 24, 2010.

What has been the reaction of Medafor's board to the recent CryoLife proposal?

CryoLife has attempted in earnest for over the past 16 months to engage Medafor in friendly, good faith negotiations to arrive at a transaction that would enable HemoStase and related products to reach their full potential, and create value for Medafor and CryoLife shareholders. Unfortunately, every attempt we have made to create value for Medafor shareholders has been frustrated by a value-destructive action or response from Medafor's management and board. Medafor's board, in a letter to shareholders dated February 10, 2010, rejected CryoLife's recent \$2.00 per share proposal and indicated its refusal to engage in discussions and negotiations that could lead to a higher offer. On March 12, 2010, Medafor announced an agreement with Magle Life Sciences which seemingly gives away almost 10 percent of Medafor, in addition to an undisclosed amount of much-needed cash, for the rights to a technology to which Medafor already has exclusive access.

We anticipated that Medafor management would be required to continue to engage in dilutive financings in order to fund its operating plan, and we have expressed our concerns in this regard to fellow Medafor shareholders. Nonetheless, we did not believe that Medafor's management and board would act in direct conflict with their fiduciary duties and inflict material dilution upon their shareholders, without obtaining any cash investment in return, in what appears to be an obvious effort to deny existing Medafor shareholders the right to choose whether or not to enter into a business combination with CryoLife.

Why did CryoLife choose to make its proposal and subsequent communications with Medafor's board public?

CryoLife has made every effort to work with Medafor as partners in an amicable and productive manner. We have made numerous attempts to engage with Medafor's management and board about a potential value-creating acquisition of the company by CryoLife. Medafor has rejected all of our overtures, including our latest proposal, and refused to negotiate with us. In fact, every attempt we have made to create value for Medafor shareholders has been frustrated by a value-destructive action or response from Medafor's management and board. By providing our fellow Medafor shareholders with complete and timely information, we hope to encourage Medafor's management and board to reconsider their refusal to negotiate and come to the table.

Is the proposal made to the Medafor board available to Medafor shareholders?

Not at this time. Furthermore, given the impact of the recent additional dilution from the Magle transaction on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause intentional additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal on March 24, 2010. During this time period, we urge shareholders to contact the Medafor board and impress upon them the need to uphold their fiduciary responsibilities, including providing all Medafor shareholders with sufficient details regarding the Magle transaction so that we can all understand the impact it has on the value of our Medafor common stock.

What can Medafor shareholders who wish to sell their shares to CryoLife do?

We encourage shareholders to make their voices heard to Medafor's management and board by contacting them directly and impressing upon them the need to uphold their fiduciary responsibilities, including providing all Medafor shareholders with sufficient details regarding the Magle transaction so that we can all understand the impact it has on the value of our Medafor common stock.

. Medafor has publicly stated that its contact information for management and the board is as follows:

paul.gray@yahoo.com

Medafor, Inc.

1- 877-MEDAFOR

Why is CryoLife purchasing additional shares from some investors but not making its proposal available to all?

We have purchased some additional shares from Medafor shareholders in order to bring our holding to over 10 percent and to obtain the additional right of being able to call a special shareholders meeting. While we may make some additional purchases of Medafor stock from time to time, we encourage shareholders to make their voices heard to Medafor's management and board by contacting them directly. In the event that Medafor's board continues to decide not to negotiate, CryoLife may consider additional actions to facilitate a transaction with Medafor that would not require the approval of current board members.

How does CryoLife intend to effect an acquisition of Medafor without agreement from their management/board if Medafor refuses to negotiate?

We continue to believe that a combination of our businesses makes compelling business sense for both companies and is in the best interests of our respective shareholders. However, given the impact of the recent additional dilution from the Magle transaction on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause intentional additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal at 5:00 p.m. on March 24, 2010. During this time period, we urge Medafor shareholders to contact the Medafor board and impress upon them the need to uphold their fiduciary responsibilities, including providing all Medafor shareholders with sufficient details regarding the Magle transaction so that we can all understand the impact it has on the value of our Medafor common stock. We remain willing to enter into discussions with Medafor about a combination; however, at 5:00 p.m. on March 24, 2010 our current proposal to acquire Medafor will terminate.

In the event that Medafor fails to provide shareholders with adequate information regarding the Magle transaction and we withdraw our proposal, we will remain Medafor's largest shareholder, and we intend to pursue all actions necessary to preserve the value of our investment, including the exercise of our right to call a special meeting of shareholders or pursue litigation in defense of our rights.

How has Medafor failed to help HemoStase reach its full potential? What will CryoLife do differently?

Medafor has failed to maximize the potential of HemoStase and the product's underlying technology for its shareholders. Medafor's capital constraints prevent it from conducting significant research and development and investing in its sales force and distribution network in a meaningful way. With significantly greater resources, CryoLife would remedy this.

Our management team has over 150 years combined experience in the medical device business. We have a direct sales force in the U.S. and an international distribution network comprised of both direct employees and third party representatives who are focused on cardiac, vascular and general surgeons. Our demonstrated ability to grow BioGlue into the leading global surgical adhesive demonstrates our management team's ability to create significant value for shareholders in biomaterials and we believe we can achieve similar results with HemoStase. HemoStase is complementary to CryoLife's BioGlue technology; together BioGlue and HemoStase offer a full range of products to our surgeon customers to assist them in the control and prevention of bleeding. We have already demonstrated our ability to sell HemoStase (having achieved \$6 million in sales in 2009) and have the resources available to us to ensure that HemoStase and related products properly penetrate the market.

How did CryoLife come to its most recent proposal?

The proposal price resulted from a detailed analysis of Medafor, its products, and the market conducted by CryoLife in conjunction with its financial and legal advisors. The valuation is consistent with comparable company valuations, similar M&A transactions, and other relevant metrics and methodologies. Based on our knowledge of Medafor's business at the time we made the proposal, we believe our proposal to Medafor represented full and fair value, reflecting both the upside from the growth potential of HemoStase and the product's underlying technology, as well as the downside presented by the significant IP restrictions on this product. As previously stated our analysis was based upon the best information available to us.

However, given the impact of the recent additional dilution from the Magle transaction on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause intentional additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal at 5:00 p.m. on March 24, 2010. We remain willing to enter into discussions with Medafor about a combination; however, at 5:00 p.m. on March 24, 2010 our current proposal to acquire Medafor will terminate.

Does CryoLife's Medafor stake give CryoLife any additional powers outside those of a normal shareholder?

Minnesota corporate law gives special rights to persons who own 3% or more of the common stock in Medafor. Thus, CryoLife has the right to propose amendments to the Articles of Incorporation or bylaws of Medafor at a regularly scheduled meeting of shareholders, and if a meeting has not been held during the last 15 months, CryoLife can demand one.

Additionally, as an owner of more than 10% of Medafor's outstanding shares, CryoLife has the right to call a special shareholders meeting pursuant to Medafor's bylaws.

Why is CryoLife withdrawing its offer?

We are deeply dismayed that Medafor has seemingly given away almost 10 percent of the company, in addition to an undisclosed amount of much-needed cash, for the rights to a technology to which it already has exclusive access. Given the absence of any other compelling business rationale, and its refusal to provide shareholders with an explanation of the substance of the transaction, we can only conclude that the sole purpose of the Magle transaction is to further entrench Medafor's management and board and prevent a combination between CryoLife and Medafor. Unfortunately, this share issuance is clearly harmful to all shareholders, and further demonstrates the lengths to which Medafor's management and board will go in order to entrench themselves and preserve their excessive compensation.

Given the impact of the recent additional dilution on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause intentional additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal at 5 p.m. on March 24, 2010.

What are CryoLife's next steps?

Given the impact of the recent additional dilution on the value of Medafor's stock, and our concerns that Medafor's management and board will continue to cause intentional additional harm to shareholder value, CryoLife currently intends to withdraw its \$2.00 per share proposal at 5 p.m. on March 24, 2010. During this time period, we urge Medafor shareholders to contact the Medafor board and impress upon them the need to uphold their fiduciary responsibilities, including providing all Medafor shareholders with sufficient details regarding the Magle transaction so that we can all understand the impact it has on the value of our Medafor common stock. We remain willing to enter into discussions with Medafor about a combination; however, at 5:00 p.m. on March 24, 2010 our current proposal to acquire Medafor will terminate.

In the event that Medafor fails to provide shareholders with adequate information regarding the Magle transaction and we withdraw our proposal, we will remain Medafor's largest shareholder, and we intend to pursue all actions necessary to preserve the value of our investment, including the exercise of our right to call a special meeting of shareholders or pursue litigation in defense of our rights.

When does CryoLife plan to communicate with Medafor shareholders?

We plan to continue to communicate with Medafor shareholders directly about our plans for Medafor and to share our thoughts on the appropriateness and effectiveness of management's actions and Medafor's performance and outlook.

Why did CryoLife file a lawsuit against Medafor?

On April 29, 2009, CryoLife filed a lawsuit against Medafor in the U.S. District Court for the Northern District of Georgia alleging claims for, among other things, breach of contract, fraud, negligent misrepresentation, and violations of the Georgia Racketeer Influenced and Corrupt Organizations Act. The lawsuit is ongoing.

CryoLife filed the lawsuit in order to protect its rights and the rights of its shareholders, and ensure that the potential of HemoStase is fully maximized. The litigation originated because Medafor repeatedly breached the exclusive distribution agreement that was signed in good faith by CryoLife. More information about the lawsuit and the events leading up to it can be found in a special section on our Web site, which is located at <http://www.cryolife.com/medaforoffer/litigationoverview>.

Who can shareholders contact if they have questions?

You may contact Nina Devlin at Edelman at 212-704-8145 for more information. You may also leave a question at the following email address: medaforinfo@cryolife.com and someone will contact you.

Statements made in this document that look forward in time or that express management's beliefs, expectations or hopes are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements include those regarding future actions we may take with respect to Medafor, our efforts to acquire full control of HemoStase and Medafor's hemostatic technology, our ability to help HemoStase realize its full potential and drive additional sales of HemoStase and related products, and create value and increase returns for CryoLife and Medafor shareholders, our plans to communicate with Medafor shareholders about our plans for Medafor, our intention to pursue all actions necessary to preserve the value of our investment in Medafor, and our intention to withdraw our current proposal to acquire Medafor. These future events may not occur as and when expected, if at all, and, together with our business, are subject to various risks and uncertainties. These risks and uncertainties include that any transaction with Medafor may not occur or may be delayed due to circumstances and events beyond our control, including legal impediments, we may not be able to realize the anticipated benefits of a transaction with Medafor, our plans regarding Medafor may change, our plans to communicate publicly regarding Medafor may change and may be influenced by various legal and regulatory considerations, and Medafor's management may act in ways that differ from our current expectations. The timing of and our ability to communicate with Medafor shareholders may be impacted by the actions of Medafor management. Also, the success of any transaction between CryoLife and Medafor is subject to risks facing both companies. These risks include that CryoLife is significantly dependent on revenues from BioGlue and there are a variety of risks affecting BioGlue, CryoValve SG pulmonary heart valves and other SynerGraft processed tissues and products may not be accepted by the marketplace, the CryoValve SG pulmonary heart valve has a one year shelf life, the CryoPatch SG has a one year shelf life, we are dependent on the availability of sufficient quantities of tissue from human donors, the CryoValve SG pulmonary heart valve post-clearance study requested by the FDA may not provide the expected positive results, our products and tissues we process and preserve have allegedly caused and may in the future cause injury to patients, and we have been and may be exposed to tissue processing and product liability claims and additional regulatory scrutiny as a result, the possibility that the FDA could impose additional restrictions on our operations, issue a 483, or warning letter, or require a recall, or prevent us from processing and distributing tissues or manufacturing and distributing other products, our failure to adequately comply with government regulations could result in loss of revenues and customers as well as additional compliance expense, our ability to borrow under our credit facility may be limited, the credit facility limits our ability to pursue significant acquisitions, the financial and credit liquidity crisis may adversely affect our ability to borrow money or raise capital, the current economic crisis and future economic crises may adversely affect our business and financial condition, there are limitations on our use of net operating loss carry-forwards that could result in our inability to use them fully or at all, adverse regulatory action outside of the U.S. could affect our business, physicians have been and may be reluctant to implant or use our preserved tissues or products, our existing insurance policies may not be sufficient to cover our actual claims liability, current economic conditions may impact demand for our tissues and products, intense competition may affect our ability to operate profitably, we may be unable to obtain adequate insurance at a reasonable cost or at all, uncertainties related to patents and protection of proprietary technology may adversely affect the value of our intellectual property, uncertainties related to patents and protection of proprietary technology for products distributed by us may adversely affect our ability to distribute those products, we are dependent on key personnel, we may not be successful in obtaining necessary clinical results and regulatory approvals for products and services in development, and our new products and services may not achieve market acceptance, we may be unable to effectively leverage our existing sales force to sell HemoStase, the lawsuit we filed against Medafor regarding our distribution agreement with Medafor may continue to adversely impact our relationship with Medafor and could hamper or prevent us from distributing HemoStase, Medafor may in the future attempt to terminate our distribution agreement, rapid technological change could cause our services and products to become obsolete, extensive government regulation may adversely affect our ability to develop and sell products and services, we have experienced operating losses and negative cash flows in the past, and we must continue to address the underlying causes in order to continue to operate profitably and generate positive cash flows, investments in new technologies and acquisitions of products or distribution rights may not be successful, if we are not successful in expanding our business activities in international markets, we will be unable to pursue one of our strategies for increasing our revenues, continued deflation of foreign currencies relative to the U.S. dollar could materially and adversely impact our foreign revenues, and future healthcare policies, healthcare reimbursement methods, and healthcare reimbursement policies may affect the availability, amount, and timing of our revenues, financial condition, and profitability. These risks and uncertainties include the risk factors detailed in our Securities and Exchange Commission filings, including our Form 10-K filing for the year ended December 31, 2009 and the Company's other SEC filings. Medafor's business is also subject to a number of risks, including the risk that HemoStase does not have adequate intellectual property protection, that additional regulatory approvals may not be obtained in a timely fashion, if at all, and that product liability lawsuits could be filed in connection with the use of HemoStase. In addition, the acquisition of Medafor by CryoLife, if it occurs, could result in unexpected costs or liabilities to CryoLife due to potential non-compliance by Medafor under applicable laws and regulations, although CryoLife is currently not aware of any material non-compliance, or due to other factors that we are not currently able to predict, as we have not had the opportunity to perform a due diligence review with respect to Medafor. The Company does not undertake to update its forward-looking statements. In addition, the calculation of the estimated percentage of Medafor's outstanding shares owned by CryoLife is based on 22,795,779 shares outstanding, the number of outstanding shares shown on Medafor's shareholder list as updated on February 19, 2010 plus the announced issuance of 1.8 million shares to Magle. This calculation does not take into account any shares that may have been repurchased or issued by Medafor since that date. As a result, CryoLife's actual percentage ownership of Medafor's outstanding common stock may be greater or less than 10.3%.
