ATLANTA, GA – (February 15, 2024) – Artivion, Inc. (NYSE: AORT), a leading cardiac and vascular surgery company focused on aortic disease, today announced financial results for the fourth quarter and full year ended December 31, 2023.

"2023 was a standout year for Artivion as we exceeded our revenue and adjusted EBITDA growth targets and continued to deliver on our mission to enhance our world class, aortic focused company with a highly differentiated product portfolio and global footprint. Revenue growth in the fourth quarter was strong across all four of our product lines and all four geographies, driven by particularly strong performance in On-X with 19% constant currency growth and tissue processing with 18% constant currency growth," said Pat Mackin, Chairman, President, and Chief Executive Officer.

Mr. Mackin added, "In addition to our strong commercial results, we also completed enrollment for our PERSEVERE clinical trial which met every primary endpoint and has set the stage for success with AMDS. Trial data out to 30 days demonstrated a 72% reduction in all-cause mortality and a 52% reduction in the primary composite endpoint of major adverse events, with zero occurrence of distal anastomotic new entry, or DANE, when compared to the current standard of care hemiarch procedure. We continue to work with the FDA toward PMA approval, which we anticipate in the second half of 2025."

Mr. Mackin concluded, "Given our solid financial performance, improved capital structure, ongoing clinical progress and operational achievements in 2023, we enter 2024 with strong momentum and confidence in our ability to deliver profitable growth."

At current exchange rates, the company expects negligible year-over-year currency impact to revenue.

Artivion expects non-GAAP adjusted EBITDA, to increase between 26% and 34% for the full year 2024 compared to 2023, resulting in non-GAAP adjusted EBITDA to be in the range of \$68 to \$72 million in 2024.

The Company's financial performance for 2024 and future periods is subject to the risks identified below.

#### **Non-GAAP Financial Measures**

This press release contains non-GAAP financial measures, including non-GAAP revenue, non-GAAP net income, non-GAAP adjusted EBITDA, non-GAAP general, administrative, and marketing expenses, and free cash flows. Investors should consider this non-GAAP information in addition to, and not as a substitute for, financial measures prepared in accordance with US GAAP. In addition, this non-GAAP financial information may not be the same as similar measures presented by other companies. The Company's non-GAAP revenues are adjusted for the impact of changes in currency exchange. The Company's non-GAAP net income; non-GAAP adjusted EBITDA; non-GAAP general, administrative, and marketing, and free cash flows results exclude (as applicable) depreciation and amortization expense; interest income and expense; stock-based compensation expense; loss or gain on foreign currency revaluation; income tax expense or benefit; corporate rebranding expense; business development, integration, and severance income or expense; non-cash interest expense; gain from sale of non-financial assets, and abandonment of CardioGenesis cardiac laser therapy business. The Company generally uses non-GAAP financial measures to facilitate management's review of the operational performance of the company and as a basis for strategic planning. Company management believes that these non-GAAP presentations provide useful information to investors regarding unusual nonoperating transactions; the operating expense structure of the Company's existing and recently acquired operations, without regard to its on-going efforts to acquire additional complementary products and businesses, and the transaction and integration expenses incurred in connection with recently acquired and divested product lines; and the operating expense structure excluding fluctuations resulting from foreign currency revaluation and stock-based compensation expense. The Company believes it is useful to exclude certain expenses because such amounts in any specific period may not directly correlate to the underlying performance of its business operations or can vary significantly between periods as a result of factors such as impact of recent acquisitions, non-cash expense related to amortization of previously acquired tangible and intangible assets, and any related adjustments to their carrying values. The Company has adjusted for the impact of changes in currency exchange from certain revenues to evaluate comparable product growth rates on a constant currency basis. The Company does, however, expect to incur similar types of expenses and currency exchange impacts in the future, and this non-GAAP financial information should not be viewed as a statement or indication that these types of expenses will not recur. Company management encourages investors to review the Company's consolidated financial statements and publicly filed reports in their entirety, including the reconciliation of GAAP to non-GAAP financial measures.
